Exposed diagnostic set · 3 seeds · same insertion start · fleet, then distance · dotted lines: SINTEF BKS
Community runs independent serial solvers in one JVM. CBLs uses independent Julia workers. Different solver versions/profiles.

— CBLs + ICN — Timefold LA 400 — Timefold LA 1,000 ··· SINTEF BKS (rounded distance)

XKCDMake illustration; plain-style version has exact coordinates. Descriptive rates from 3 runs; no extrapolation.
